Art Unit: 3731

## **DETAILED ACTION**

## Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, drawn to a system for vascularizing a selected portion of the myocardium of the heart, classified in class 606, subclass 185.
  - II. Claims 20-32, drawn to a method of increasing blood flow in the wall of the myocardium, classified in class 128, subclass 898.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (M.E.P.. § 806.05(e)). In this case the apparatus as claimed can be used for insert in the blood vessel to retain the blood vessel open and is not limited to increasing blood flow in the wall of the myocardium method of the process claims.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/369,107

Art Unit: 3731

- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Barry Stein on 1/31/00 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Truong whose telephone number is (703) 308-3767. The examiner can normally be reached Monday through Friday from 7:00 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Michael Buiz can be reached at (703) 308-0871. The fax number for the Group is (703) 308-0758.

Art Unit: 3731

Any inquiry of a general nature or relating to the status of the application should be directed to the Group receptionist at (703) 308-0858.
